

After watching the video try to answer these questions:

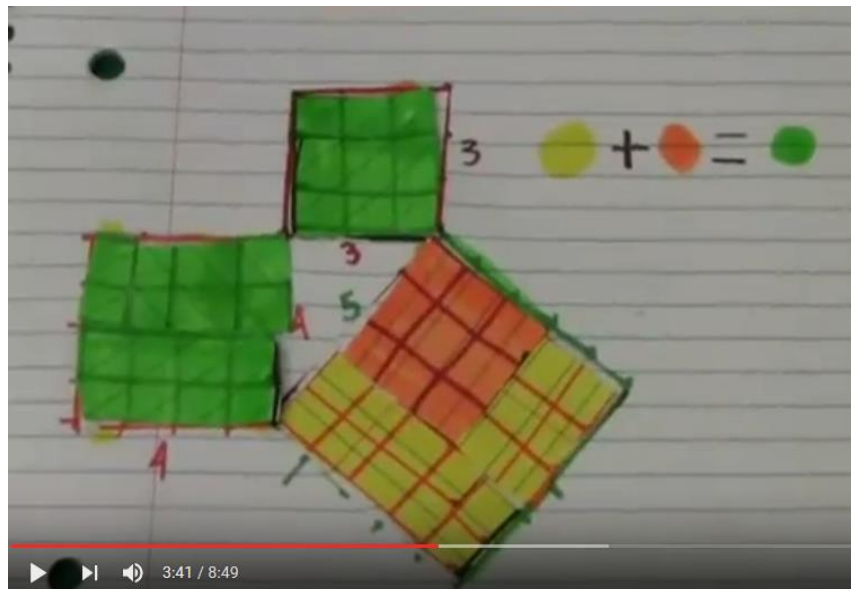

To work in pairs

Time to deliver: 2weeks

It is going to count the 15% of the final mark

Points to evaluate:

- Way of expressing, creativity, mathematic concepts, way of presentation.
1. Which problem do they have about numbers like 2.56 or 5.66? How do they solve the way to express the proportion between 2,718 by 6,280?
 2. Represent the Pythagoras theorem demonstration as in the video by using a piece of paper, scissors and some colours.

3. Had Pythagoras killed anyone? Why? (Try to explain the conflict).
4. Could you explain why Pythagoras die and how?
5. Try to make a video using the same technique (write and draw while speaking) as in the example given to explain the Pythagoras Theorem.
